PROFILE

I'm someone who loves building and designing websites, especially using WordPress. I enjoy making websites look great and easy to use. Whether it's designing how a website looks or customizing it to do exactly what someone needs, I'm all about making things awesome. I'm always eager to learn new stuff and make sure every project I work on is top-notch.

WORK EXPERIENCE

Web Development 2024 - PRESENT

I worked as a web developer, focusing on creating websites using WordPress. I customized WordPress themes and plugins to meet the specific needs of our clients. This involved writing code in languages like HTML, CSS, JavaScript, and PHP. I ensured that the websites were responsive and user-friendly across different devices. Additionally, I conducted testing and debugging to maintain optimal performance. I also provided ongoing support and maintenance for existing WordPress websites.

Web Designing 2024 - PRESENT

As a web designer, I worked closely with clients to create attractive and user-friendly websites using WordPress. I transformed client ideas into engaging design concepts, developing wireframes and prototypes to plan the layout and user experience. Using graphic design tools, I created custom graphics to enhance the website's appearance. I ensured that designs were consistent and responsive across different devices. Collaborating with developers, I implemented designs into WordPress themes to make them functional online.
